

*Saves Scraper's Time!*

(Single-size tube)

## DYKEM HI-SPOT BLUE NO. 107

For Locating High Spots  
when Scraping Bearing Surfaces  
**NON-DRYING      NON-HARDENING**

Dykem Hi-Spot Blue No. 107 does not dry out. It remains in condition on the work indefinitely. Because it does not dry, no night clean-up and morning re-bluing is necessary. *This saves the scraper's time!*

Dykem Hi-Spot Blue No. 107 is a soft, uniform paste, intensely blue, that spreads easily and evenly, and transfers clearly from master surface gage to show up the high spots on the bearing surface.

Most valuable for scraping on flat bearing surfaces of Lathes, Planers, Milling Machines, etc.

Half-size tubes (1/2" x 2")  
Single-size tubes (1/2" x 4")  
Double-size tubes (3/4" x 4")
